- **Folate** – Adequate levels of folate are essential for brain function, and folate deficiency can lead to neurological disorders, such as depression and cognitive impairment.

- **Iron** – Students with iron deficiency have demonstrated lower math scores than those with normal iron status.
- **Omega-3 fatty acids** – These fatty acids are essential for normal brain function, and positively affect learning and memory. Research shows that students who had an increase of Omega-3 fatty acids performed better in reading, spelling, and had fewer behavioral problems.

- **Omega-3 脂肪酸**—这些脂肪酸主要用于正常的脑功能,并积极影响学习和记忆。研究表明,学生增加了 ω -3脂肪酸进行更好的阅读,拼写,更少的行为问题。
